

# race to 10, 20, or 50

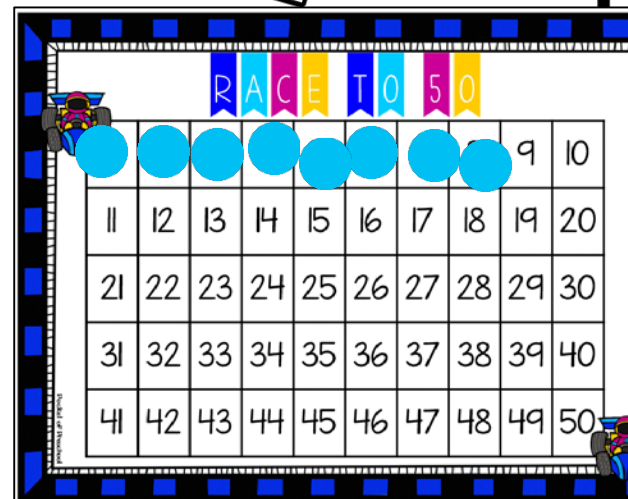

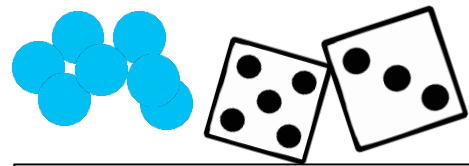

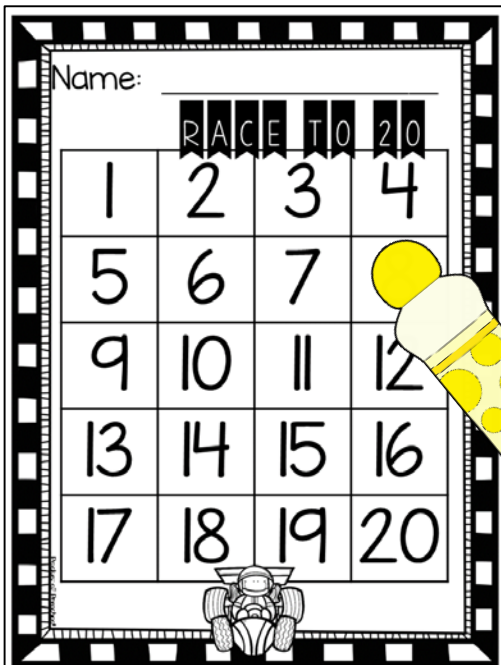

Print and laminate the colored boards and put out with counters, or copy the Blackline boards and put out with dot markers/crayons. My kids LOVE to take home their finished boards to show their families!

## How to Play:

**Counting:** Students take turns rolling one dice and dotting the corresponding number on their board. They keep playing until their board is full.

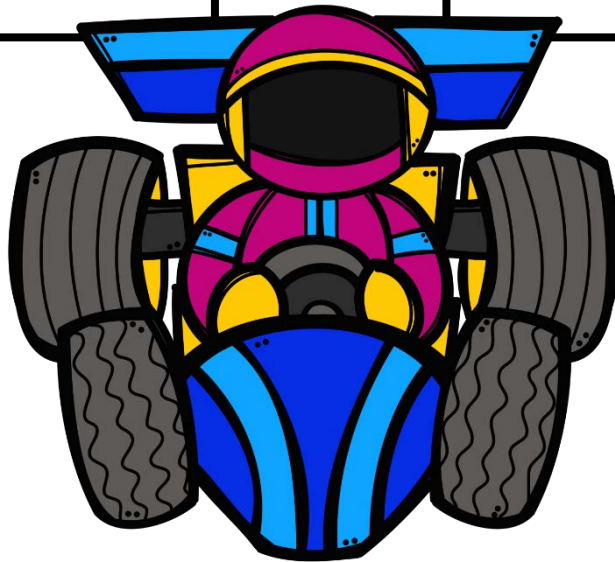

**Adding:** Students take turns rolling two dice, adding the numbers together, and dotting the sum on their board.

This game can be played alone or with a peer.
